# INSTI HIV Self Test

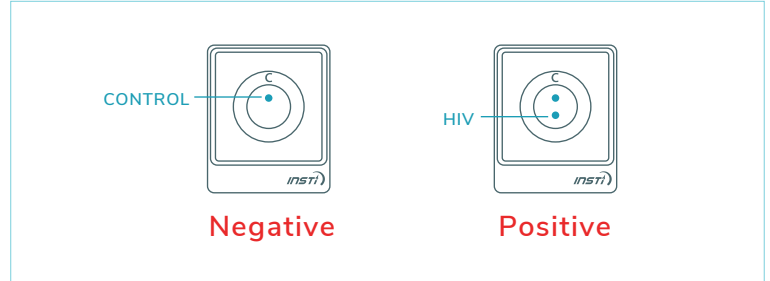

Detects HIV-1 and HIV-2 antibodies using a drop of fingerstick blood

Knowing your result can be as easy as 1, 2, 3...

Sample & pour

Read results immediately!

Using its novel flow-through technology, INSTI provides instant results that are over 99% accurate.

Canada's first and only HIV self-test.

- ⊕ Early HIV detection
- ⊕ Proven accuracy
- ⊕ Built-in control to ensure test validity and sample addition
- ⊕ Easy to use
- ⊕ No timers required
- ⊕ All components included
- ⊕ Health Canada Approved, CE marked and WHO Prequalified

Each test contains: test device, solutions, lancet, alcohol swab, bandage, and instructions.

## Trusted Technology That Works.

**Sensitivity.** INSTI detects IgM and IgG antibodies, which enhances its utility in early diagnosis.<sup>1</sup>

Confidence. Our built-in control technology gives you confirmation that you have performed the steps correctly and confidence that your test result is valid.
